Training the ROTC way

Above, ROTC cadet Pat Gorey climbs a 70-foot high wall at the Winter Field Training Exercise at Vandenberg Air Force Base this weekend. This event was the first of a series of 21 that the cadets went through. Becky Schneider and other cadets receive a briefing prior to the start of the obstacle course. The entire ROTC department participated in the two days of training. The cadets spent Saturday morning running through the advanced confidence course and returned in the afternoon to go through navigation exercises. The Cal Poly ROTC department participates in winter exercises every year, but this was the first time it has used the facilities at Vandenberg.

LAWRENCE STAYTON/Special to the Daily

Bids are in for new ag building

By Greg Colbert
Staff Writer

Bids for construction of the new agriculture science building are currently being analyzed by the Cal Poly executive dean.

Five firms made offers and apparently the lowest bidder was Bernards Brothers Inc., with a bid of \$5.52 million. Executive Dean Doug Gerard is waiting until all bids have been analyzed before deciding which company will construct the building.

Groundbreaking for the new agricultural science building is scheduled for sometime this spring, the associate dean of the School of Agriculture said Monday.

"Current plans are for groundbreaking to be held in May 1986, with completion of the building two years later, in time to be open and ready for classes by fall of 1988," said Associate Dean Larry Rathbun.

The new agriculture science building will be constructed south of the Food Processing Building and north of the Mathematics and Home Economics Building. That area is currently a parking lot for students and staff, but Rathbun said other plans are also underway.

"We are examining the relocation of the rodeo arena to the north end of the horse track, and the current rodeo arena would become student parking," Rathbun said.

Rathbun said the new building will eliminate temporary facilities currently in use by the ornamental horticulture, natural resources management and crop science departments.

The new agriculture science building will house one floor of offices, one floor of laboratories, one general purpose lecture hall, one general purpose computer facility and a roof-top greenhouse.

Anthropologist speaks

Cavemen weren't hunters

BERKELEY, Calif. (AP) — An anthropologist says the earliest humans may have been a little on the wimpy side, scavengers rather than the big-game hunters and hearth-hugging cave dwellers depicted in cartoons.

Humankind's ancestors were by no means the "snarling creatures who ate meat and devoured their own grandmothers," Lewis R. Binford told a symposium at the University of California on Sunday.

"Our ancestors had not been killer apes hunting the large and ferocious animals of their times," the University of New Mexico scientist said in an address to 1,500 persons at the symposium on diet in evolution sponsored by the L.S.B. Leakey Foundation.

IN A WORD

demi-vierge — n., a girl or woman who engages in lewd or suggestive speech and usually promiscuous petting but retains her virginity.

WEATHER

Increasing cloudiness Wednesday with a chance of rain by Thursday morning. Highs should be in the mid-60s.

ON THE STREET

What music group would you like to see at Poly?

Jeff Tolle, agricultural business management, junior:

The Hooters would be a good group — the Simple Minds. The music's popular but not real Top 40.

Becky Jonas, aeronautical engineering, junior:

General Public — seems like everyone likes them. I'd love to see the Talking Heads but I don't think they'd come here ... Anyone, God — a concert, period.

Dave Lopez, Dietetics and Food Administration, junior:

Bruce Springsteen — The Boss — or John Cougar Mellencamp.

Joan Mary Laubacher, physical education, senior:

I'd like to see a nice jazz or mellow concert. Everything else is starting to sound the same.

Steve Widdicombe, speech communication, senior:

Oingo Boingo. They're really energetic and put on a good show. The last concert I saw was Eddie Money two years ago. The best concert was Big Country.

LETTERS TO THE EDITOR

Brady column called 'pompous hogwash'

Editor — Pete Brady's latest contribution to our opinion page was a perplexing assortment of inaccurate and pompous hogwash. I was not aware that the First Amendment guarantees individuals the right "to say virtually whatever they want (to say) however they want to say it" as Brady claims. I presume that Brady has in mind to redefine the First Amendment for us, so I think a summary of the important limitations imposed on freedom of speech by the Supreme Court will clarify this "issue."

First of all, obscenity, as defined by the Roth/Albets Standard, is not protected by the First Amendment. Second, Justice Oliver Wendell Holmes restricted freedom of expression in cases of "clear and present danger" to the public. The famous scenario of yelling "Fire!" in a crowded theater illustrates the need for this restriction.

Third, freedom of speech is restricted by the "bad tendency test" which seeks to avoid in-stigative expression (during World War I, leaflets were distributed in some parts of this country discouraging citizens from joining the armed forces). A fourth form of expression not protected by the First Amendment is the burning of draft cards. The Constitution does not uphold this act as a right of the individual. In these and many other court cases, the Supreme Court has shown itself to be diligent and forthright in the preservation of our right to freedom of expression. I don't think any of us needs a junior journalism major to champion our freedoms for us — we already have an excellent authority on the subject.

Further, I do not appreciate being quoted out of context by Brady. In my previous letter, I did not allege "that American television raised the level of 'fear and anxieties' throughout the world!" I did, however, point out that an American television program depicting a Soviet takeover of the United States would indicate to the peoples and leaders of other countries in the world that Americans are obsessed with a Soviet-American confrontation. The Soviet Union has renounced any "first strike" policy; it's the United States that still holds onto that idea! This program

"Amerika" is bad press, slapping us in the face with every episode.

I also do not appreciate Brady's insinuations. He holds his readership in contempt, attaching assumed derogatory traits onto people he has never even met. If misleading statements and shoddy journalism are the meaning behind "No Holds Barred," the editor has a responsibility to the student body, to the Cal Poly Alumni, and to the integrity of Mustang Daily to demand a better product.

Brady's defense of freedom of expression is an unquestionable point: nobody would deny that freedom of speech must be protected. Brady has used our sacred right to speak freely as a way to proclaim to us his unfaltering virtue and to condemn anyone who does not agree with his views. I realize the necessity for our budding journalists to cut their teeth with hands-on writing experience, but our standards of excellence must not be sacrificed. I challenge Mustang Daily to stand up for excellence.

DAVID J. WHITEHEAD

Mendes doesn't know First Amendment

Editor — I suggest that this year's ASI President, Mike Mendes, read the First Amendment to the United States Constitution thoroughly before again suggesting an outside policy board for Mustang Daily. He might discover a little-known provision (at least, apparently, to him) for "freedom of the press."

You see, freedom of the press is a right (not a privilege) that protects the news media from people such as ASI presidents who think they know what's right or who overreact when their special interests (as in your case) are affected by unfortunate circumstances.

Your proposal of an outside policy board is a veiled suggestion of two things: censorship and outside editorial control. Why don't civic-governmental leaders who read the San Luis Obispo County Telegram-Tribune, Los Angeles Times or San Francisco Chronicle suggest any type of policy board for those papers? Because they'd be laughed out (or thrown out) of the room by readers. Why? Because of the constitutional provision you ap-

parently overlooked in all your history and political science classes.

Mustang Daily supports itself through advertising revenues (one of the few school papers that does) and receives no financial help from the ASI. It looks the best and reads as well as it has in years. It is run by a group of students who are paid nothing as reporters and little as editors, carry full class loads, and still put in the hours during day and night to get out a daily paper.

In contrast to this dedication, your motivation is based not on selfless concerns but on the handling of an advertisement for the recreation center, an issue also known as Mike Mendes' pet project. And then you call this your "duty?" What a populist you are. To think I voted for you before graduating.

My apologies to the present staff of the Daily and the readers they serve for that mistake.

ROBIN LEWIS
Former editor, Mustang Daily

Reader is proud of students for rec vote

Editor — Once again I have reason to be proud of our students. You have given of yourselves to bear some of the burden for a facility that few of you here today will ever use — but which future generations will enjoy just as you have benefited from the University Union building. My hat is off to all of you who demonstrated the courage and foresight to help in the building of a better Cal Poly.

MARK A. COOPER

Letters Policy

Mustang Daily encourages reader's opinions, criticisms and comments. Letters and press releases should be submitted to Room 226 of the Graphics Arts Building, Cal Poly, San Luis Obispo CA 93407.

Letters should be shorter than 250 words, must be typed and include the writer's signature and phone number. Editors reserve the right to edit all letters for length and style and omit libelous errors. Letters will not be published without the author's name.

Shuttle documents requested

WASHINGTON (AP) — A presidential commission investigating the Challenger explosion told NASA to turn over all internal space agency documents on what a newspaper called the "potential failure" of critical seals in the shuttle's booster rockets.

Commission Chairman William P. Rogers said he asked for the documents Sunday after a New York Times article described discrepancies between internal memorandums of the National Aeronautics and Space Administration and what space agency officials told the panel last week.

Rogers said in a telephone interview that NASA had agreed to cooperate with the request, but he declined to discuss the matter further.

Five South Africans found dead

JOHANNESBURG, South Africa (AP) — Police said Monday they found the bodies of five blacks who were bound, stabbed and burned with what has become known as the "necklace" — gasoline-soaked tires placed around them and set afire.

The killings appeared to be part of the struggle between rival anti-apartheid groups that differ on how to fight white-minority rule.

Four of the bodies were found together, with more tires piled on them to form a funeral pyre, and the fifth was a short distance away.

Assembly starts final vote count

MANILA, Philippines (AP) — The government-dominated National Assembly held the first meeting Monday on its official vote canvass, which by law will determine who won the disputed presidential election.

In the slow count of ballots cast last Friday, the government election commission showed President Ferdinand E. Marcos leading by 53 percent to 47. An unofficial count by a citizens' poll-watching group of more votes showed challenger Corazon Aquino ahead by the same margin.

CAMPUS CAPERS

BY GRANT SHAFFER

Students to rebuild shantytown

STANFORD, Calif. (AP) — Black student leaders at Stanford University, calling the destruction of a small shantytown on the campus "a racist act," vowed Monday to rebuild the symbol of solidarity with the anti-apartheid movement in South Africa.

Campus police said they are investigating the apparent vandalism, but have no leads.

"It looks like somebody just pushed it over," said police Capt. Raoul Neimeyer. "It was pretty flimsy. We didn't see any graffiti or painting or anything. Typi-

cally, we have a lot of vandalism over the weekend, bikes run over, windows broken, things like that. We don't know if this was politically motivated."

The three cardboard, wood and plastic shacks, erected by a student group called Stanford Out of South Africa, were seen standing about 11 p.m. on Saturday by a campus security officer, but were flattened when the officer passed by three hours later, Neimeyer said.

University President Donald Kennedy, alerted to the destruction by SOSA members, asked

campus police to investigate on Sunday evening.

"We need to try to find out what was done, by whom and for what reason," Kennedy said through a spokesman.

Black Student Union president Steve Phillips called the act "racist" and "a disgrace," adding that it showed "a total disregard for those people struggling to aid the people of South Africa."

A similar incident occurred last month at Dartmouth University, causing the school to shut down classes for a day.

LOOKING FOR A QUIET PLACE TO LIVE?

If you have ever heard of MURRAY ST. STATION, you know our reputation for:

- 1 & 2 bedroom furnished apts.
- Quiet living
- 10 min. walk to campus
- 5% interest paid on cleaning and security deposit
- Solar heated swimming pool
- Low Utilities
- 9-month leases (2 bdrm. only)
- Hot water paid
- Up Graded Furnishings

Murray St. Station is now beginning their application process for fall. Stop by our office any time M-F 9-12 1:30-5 or Sat. 9-12 to pick up your application. Applications may be returned beginning March 1 at 2pm on a first come Priority Basis.

Training for the Forest Service

Story by Marianne Favro
Illustration by Grant Shaffer

One week each month, 24 United States Forest Service employees take courses at Cal Poly in an effort to advance in their careers.

The students, who are mostly between the ages of 30 and 40, were chosen out of 150 applicants throughout California because of their perceived ability to become managers, said the head of the natural resources management department, Norm Pillsbury. "This is an intensified program in which the students go to school here one week a month and complete 12 units in five weeks," said Pillsbury.

The special U.S. Forest Service Training Program was proposed in May 1985 and was designed to help give select foresters the education needed to move up within the Forest Service. Pillsbury said the program was put into action quickly because of a class action suit filed against the U.S. Forest Service because of the lack of upward mobility for women in the service. Exactly

half of the students in the program are women, which helps alleviate the underrepresentation of women in forestry.

Pillsbury said Cal Poly was selected by the Forest Service because "It felt our view of forestry management was more progressive than any other university on the West Coast."

Pillsbury, who teaches one of the courses offered in the program this quarter, said the stu-

dents are helpful because they are working in the forestry field and can relay new information to undergraduates about the profession.

Anne Carlson, an archaeologist for the Tahoe National Forest and a student in the program, said the courses she is taking at Cal Poly will allow her to apply for a higher position which would otherwise be closed to her. "I think it's good that the professors here aren't watering

down the courses we take. I know I'm receiving as much information as I would if I was on the quarter system."

She said the biggest drawback about the program was the long commute to Cal Poly every month.

Steve Gallegos, a student in the program and a fire staff officer for the Cleveland National Forest in San Diego, said the hardest part about going back to school after 20 years is re-

establishing study habits. "It's hard to hold down a job, manage a family and go to school," said Gallegos.

Rick Larson, a forestry technician for the Sequoia National Forest, said "Because the program is so intense, studying for my classes takes up all my free time and takes time away from my family."

Pillsbury said part of the problem of the intensity of the program might be alleviated with the installation of a new computer at Cal Poly. "It's called the Data General 10,000 and is the first mail electronic office hour in the United States," said Pillsbury. He said it will allow the students in the program who are working in various places throughout the state to send homework and ask questions through the computers at their work stations. "That way if any students have questions about assignments or material they can send messages to the faculty here and don't have to wait four weeks to get their questions answered," said Pillsbury.

Part of Lucasfilm Ltd. purchased by Apple co-founder

SAN RAFAEL, Calif. (AP) — A computer graphics division of Lucasfilm Ltd. has been acquired by employees of the department and Steven P. Jobs, the Apple Computer Inc. co-founder who lost a bitter power struggle in that company last year.

A majority interest in Pixar, formed by George Lucas in 1979 to bring high technology to the film industry, was purchased by Jobs for an undisclosed sum in the millions, according to a written statement issued Monday.

Jobs plans to market the Pixar Image Computer, which is 200 times faster than conventional minicomputers at performing complex graphic and image computations.

CALENDAR

11
TUESDAY

•The Afro-American Student Union along with the ASI Special Events and Fine Arts Committees will sponsor Phillip E. Walker in a chronology of black leaders titled "Can I Speak for You Brother?" The program starts at 8 p.m. in Chumash Auditorium. Tickets are \$4 for adults, \$3 for students and senior adults.

•Argentine architect and professor of architecture Marien de Elser will discuss the state of architecture in Argentina in a speech titled "Argentina: 20th Century Architecture" at 7:30 p.m. in the Gallery of the Architecture and Environmental Design building. Admission is \$1.

12
WEDNESDAY

•Oscar Ramirez of the foreign language department will speak on "Italian Impressionist Art" at 11 a.m. in U.U. Room 217D as part of Multi-Cultural Month.

•Congressman Leon Panetta will present a "Report from Congress" at 2 p.m. in U.U. Room 220. The speech is free and the public is welcome.

13
THURSDAY

•The ASI Speakers Forum will feature a speech by broadcast journalist and Moral Majority

14
FRIDAY

•The National Wrestling Alliance will perform at 8 p.m. in the Cal Poly Main Gym. The program will feature such nationally known wrestlers as Rocky "Soul Man" Johnson, Jimmy "Superfly" Snuka, and "Lady Satan." Tickets are available at the U.U. Ticket Office and the usual outlets at \$5 for children and senior citizens and \$7 for students and the general public.

15
SATURDAY

•The Latin American Students Association will sponsor the se-

cond annual Latin American Symposium from 9 a.m. to 5 p.m. in Chumash Auditorium. This year's theme is "Why is Latin America the Center of Economic and Political Struggle Today?" Admission is free.

18
TUESDAY

•The American Society of Civil Engineers will sponsor a Popple Bridge contest at 11 a.m. in the U.U. Plaza.

19
WEDNESDAY

•The TV Programming Committee of ASI Program Board will sponsor a satellite broadcast of the acts appearing at the closing banquet of the National Association of College Activities convention followed by a symposium of great directors such as Steven Spielberg. The telecast will begin at 3 p.m. in Chumash Auditorium.

•The Learning Assistance Center will sponsor a seminar on "Reading your Textbooks for Maximum Efficiency ... A Quality Approach" at 10 a.m. in Chase

Hall Room 102.

20
THURSDAY

•Peter S. Pao of Hughes Aircraft will speak on "Computers and Modern Radar" at 11 a.m. in Science building Room B-5 as part of the Engineering and Computer Science Lecture Series.

•A personal development symposium titled "Soaring on Wings of Choice" will be held from 11 a.m. in U.U. Room 204. Discussion will center on personal decision making and motivational drives; admission is free.

21
FRIDAY

•The Health Examination Mobile Health Testing Unit will be on campus for the annual health screening program sponsored by the Association of California State University Professors. The testing unit will be located in Health Center parking Lot C-7 and all faculty and staff members and their families are eligible. Prices and appointments

are available by calling 1-800-542-6233.

22
SATURDAY

•Cal Poly Extension and the Central Coast Interior Designers Association will co-sponsor an all-day program to update interior designers and decorators on contract liabilities, fees, and lighting design. The program will run from 9 a.m. to 3 p.m. at the Santa Maria Inn and enrollment is \$45. More information on the program is available at the Cal Poly Extension office.

•Cal Poly radio KCPR will begin its First Annual Pledge Week to raise money for its continued operation. Listeners will be able to call in pledges anytime through March 1.

23
SUNDAY

•The Cal Poly Women's and Men's Chorus will give their 48th annual Home Concert at 8 p.m. in the Cal Poly Theatre. Tickets are \$4 for the public and \$2 for students.

8 ways to get a man to ask you out again.

1. When he mentions "The Bears," know they're from Chicago.
2. Seem unimpressed when he tells you he scored a hat trick in the third period.
3. Take his word for it when he tells you that 1984 was a very good year for Chardonnays.
4. Laugh at his jokes, even when he forgets the punch lines.
5. Avoid, at all costs, letting him see you reapply your lipstick.
6. Order something more exotic than a white wine spritzer.
7. Compliment him on his taste in colors, even if he arrives in jeans and a T-shirt.
8. Tell him you'd ask him up for a Suisse Mocha, but you only do that on second dates.

CAVEMEN

From page 1

"Instead they regularly scavenged the carcasses of animals killed by other predators and only relatively recently turned to hunting as a way of life."

He said the races that evolved before homo sapiens were timid, "not very swift" hunters at best and used their stone tools merely to crack bones of dead animals.

All the speakers except Binford held that pre-humans of two million years ago had rudimentary social groups with men hunting game and women gathering nuts, roots and fruits that were shared with small clans.

Binford contended the large brains of the earliest ancestors of humankind did not mean they were as smart as true humans, nor did they possess much language or social organization.

Binford said he examined fossil bones at sites where the earliest pre-human remains have been found.

There is no evidence the animals were killed by hunters, he argued. The scientist said the bones are curiously limited to bits of animal forelegs and scalps that contained very little meat but whose cavities were exceptionally rich in fatty substances such as marrow.

Binford said the animals had most probably died at a distance from the habitation of pre-humans who later scavenged the remains.

Congratulations to the following people for their noteworthy achievements:

Students

□ **Speech and debate team** — At the recent Governor's Cup Invitational Tournament, hosted by Sacramento City College, senior Mark Crossman and junior Barbara Wimpee placed first in the open division of debate.

The pair won four of six preliminary debates. They defeated San Francisco State University in the quarter-final round and the University of Nevada, Reno, in the semi-final round, both on unanimous decisions. Crossman and Wimpee then won the tournament championship by defeating Cal State Sacramento on a split decision. Wimpee was the second-rated individual debater in the division.

In individual speaking events, freshman Craig Harris was a finalist in novice prose interpretation.

Also competing for Cal Poly were freshmen Debbie Dougherty and Laura Jimenez and senior Mike Pierson.

At the Willamette Invitational tournament in Salem, Ore., senior Janice Solimeno and junior Tim Blanton were awarded third place in the open division of debate. Solimeno and Blanton won four of six preliminary rounds and advanced to the semi-final round, where they lost a split decision to Whitman College. Solimeno and Blanton also received recognition as the sixth and seventh rated individual debaters in the division.

□ **Bill LaFontaine** — A 1985 graduate of the metallurgical engineering department, LaFontaine won the Best Student Paper Contest. This national contest was sponsored by the Metallurgical Society of the American Institute of Petroleum, Mining and Metallurgical Engineers. One award is made each year and consists of \$250

plus another \$250 for travel to appear at the National Convention at New Orleans in March to accept the award.

□ **first place** in the recent Collegiate Livestock Judging Contest in Phoenix, Ariz. They placed first in the field of

NOTABLES

The paper, titled, "The Effect of Intermediate Annealing Treatments on the Mechanical Properties of a Cu-Zn-Al Alloy" was his senior project.

□ **School of Agriculture** — Students representing the School of Agriculture won two of the top three places in a speech contest held as part of the California Plant and Soil Conference recently in Sacramento.

Sophomore Erik Wilkins finished first and senior Gerrit Rost placed third. Wilkins received a \$100 award and Rost received \$50.

The students presented speeches on The Sustainability of California Agriculture in competition with graduate and undergraduate agriculture students from other colleges and universities in the state.

The event is annually sponsored by the California Chapter of the American Society of Agronomy.

Crop science student Louis Harper was named chairman of the Student Speech Contest at the national meeting of the American Society of Agronomy in Chicago. Wilkins was named National Student Membership Chairman.

□ **Livestock judging team** — Members of the university livestock judging team brought back 13 college and university teams

in the competition after finishing second in cattle, swine and oral reasons, and fifth in both quarter horses and sheep.

The team was led by sophomore Chris Nelson, who was the high individual in swine and finished fifth in both cattle and reasons. Also contributing to the Cal Poly effort were sophomores Frank Crum, who was third overall and third in cattle; Carroll Flowers, who was fourth in both cattle and swine; and Jeff Kearnan who placed fourth in quarter horses.

Also on the team were junior Terry Johnson and senior Julie Ann Moore.

Faculty and staff

□ **Jay Devore, Roxy Peck and John Groves** — Statistics professors Devore and Peck have had their book, "Statistics: The Exploration and Analysis" published by West Publishing Co. The book is intended for use in a general introductory statistics course. Groves, also a member of the statistics faculty, prepared both the instructor's manual and the student study guide.

□ **Robert L. Hoover** — Social sciences professor Hoover read a paper, "Spanish Colonial Research Within the Framework of World System Theory," at the annual meeting of the Society for Historical Archaeology in Sacramento.

□ **William Little** — Foreign languages professor Little served as an outside evaluator for the foreign language department at CSU Los Angeles.

□ **Lynne Gamble** — Associate librarian Gamble had her paper, "Assessing Collection Development Organization in a Small

Academic Library," selected for presentation at the fourth American College and Research Libraries National Conference in Baltimore, and for inclusion in the published conference proceeding.

Gifts

□ **Ag Science** — George Conley recently gave \$5,000 to the agricultural education department to be used as the department sees fit. Conley is the grandparent of an ag science alumnus and a current ag science major.

Department news

□ **ASHRAE** — The oldest student chapter of the American Society of Heating, Refrigeration and Air Conditioning Engineers is celebrating its 50th year on the Cal Poly campus. There are 100 chapters nationwide.

Entries for Notables must be received by 4 p.m. Friday at the Mustang Daily office, Graphic Arts Building Room 226, to be considered for Tuesday publication.

MUSTANG DAILY

Erik Rinde bobs up for air during the breaststroke Saturday against number two ranked CSU Bakersfield. The Mustangs lost the meet 57-38.

DUANE MELIWOCK/Mustang Daily

Mustang Swimmers sunk by Bakersfield

By Chris Counts
Staff Writer

Despite losing to Cal State Bakersfield Saturday, Cal Poly swimming coach Bob Madrigal offered nothing but praise for his team after its final conference meet.

The Mustangs won every stroke event, but the Roadrunners took all the freestyle events. "Everytime we won an event they (Bakersfield) placed second and third," coach Bob Madrigal said. "You can't expect to win a meet and give up second and third place in every race. We just

lack depth."

The lack of depth Madrigal referred to was clearly evident Saturday as they lost the meet 57-38.

Hosting Bakersfield, a team ranked second nationwide among Division II schools, brought out the best in many Cal Poly swimmers.

Cal Poly's 400-yard medley relay team of Rich Swoboda, Neil Leary, Jim Lawrence, and Erik Rinde posted its best time of the season at 3:37.7. Rinde paced all Cal Poly swimmers, winning the 400-yard individual medley and 200-yard breaststroke races with times of 4:13.27 and 2:15.02 respectively.

Swoboda won the 200-yard backstroke in 2:00.21 and Leary took first in the 200-yard butterfly, posting a time of 1:56.49.

Kevin Walker posted his personal bests in both the 200-yard and 500-yard freestyle races, clocking in at 1:48.3 in the former and 4:57.1 in the latter. Bob Frappia posted his best time of the season in the 1650-yard freestyle race with a time of 16:44.5.

Jim Lawrence also swam his season's best in the 50 and 100-yard freestyle, posting times of 22.2 and 48.48 respectively.

Cal Poly's women's swimming team also competed against Cal State Bakersfield last weekend, but only on an exhibition basis. Claudia Watters posted her best time ever in the 200-yard backstroke, missing national qualification by only a half-second.

"I expect Claudia to qualify for nationals," Madrigal said. "She should hit her peak at the conference finals next week."

TERADYNE

From TERADYNE A Very Large Scale Invitation from a Technology Leader

In electronics, the era of very large scale integration (VLSI) has arrived, leaving many companies with products suddenly obsolete and engineering staffs struggling to catch up.

But not Teradyne. Thanks to \$119 million spent on R & D in 1981-1984, Teradyne was ready and waiting for VLSI.

Ready with VLSI memory testers, logic testers, analog testers, board testers.

Ready in Boston, Ma., and Woodland Hills, Calif., where Teradyne develops ATE for the electronics industry.

Ready in Deerfield, Illinois, center for Teradyne's telephone system testing operations.

Ready in Nashua, New Hampshire, where Teradyne produces backplane connection systems and state-of-the-art circuit board technology designated to meet VLSI requirements.

This kind of technology leadership spells growth. Excitement. Challenge. Career opportunities you just can't find anywhere else.

Teradyne. A company ahead of its time, looking for some good people to keep it ahead.

For more information, see your Placement Counselor.

PETE BRADY/Mustang Daily

Lacrosse Club president Gary Schare defends against a Sacramento State player in Saturday's game. The Mustangs won 16-8.

Lacrosse Club splits games

By Chris Counts
Staff Writer

After soundly defeating Sacramento State Saturday, Cal Poly's Lacrosse Club ran into both midterms and top-ranked University of Arizona Sunday, suffering its first loss of the season.

Cal Poly went into Sunday's game against Arizona at UC Santa Barbara missing three starters due to academic conflicts. After a disastrous first period in which Arizona built up an insurmountable 9-0 lead, the missing players returned. Cal Poly battled back, but Arizona triumphed 15-4.

"We weren't disappointed," Cal Poly Lacrosse Club member Dick Abano said. "Arizona is the best team in our league. They recruit players from back east. And we played well after the first period."

"We just had a bad day," Lacrosse Club member Bryan Palmer added. "We just weren't up for the game."

Cal Poly had little trouble with Sacramento State, winning at home Saturday, 16-8. Pacing Cal

Poly were club president Gary Schare with three goals and four assists, Russ Rodewald with three goals and an assist, and Renton Kreling with three goals.

Overall, Abano and Palmer agree that Cal Poly, at 2-1, is in good shape.

"We're looking real good in spite of Sunday's loss," Abano said.

Men tracksters off to good start

By T. Williams
Sports Editor

The Cal Poly men's track team got out of the blocks quickly at their first meet of the season Saturday.

The Mustangs logged six victories, 12 lifetime bests and their first three national qualifying marks at the Roadrunner Invitational in Bakersfield.

"The meet was very successful," said coach Tom Henderson. "We didn't have any injuries and we ran some very fine races."

Senior Jim Halter had a field day in the field events. He placed first in the shot with a put of 55'3", which was a national qualifying mark, and he placed first in the hammer throw, launching it 186'11", also a national qualifying mark. In an indoor event, Halter threw the 35-pound weight 57'2½" which is only about two feet shy of the NCAA Division I qualifying standard. Division II has no indoor championships in the weight throw.

The 10,000-meter race was full of lifetime best as the Mustangs finished in four of the top five spots. Chris Craig broke the tape with a lifetime best time of 30:31.2 and it was also his first win as a college athlete.

Jerry Hernandez followed Craig across the finish line in second place with a lifetime best of 30:53.6. Robin De Sota finished fourth with a lifetime best of 31:31.2 and Craig Godwin placed fifth and improved 46 seconds with a lifetime best of 31:37.2.

Dave Johnson started the season off with a bang, winning both the 110-meter high hurdles and the 400-meter intermediate

hurdles. He ran a lifetime best in the highs with a 14.6 and recorded a national qualifying mark of 52.6 in the intermediates. He also ran the anchor leg of the 4X100-meter relay.

The sprint medley team ran away from the rest of the field, winning by 14 seconds with a combined time of 3:26.7. Craig Griffin ran 200 meters, Erik Josephson ran 200 meters, Jeff Gardner ran 400 meters and Brian Porter ran 800 meters.

Coach Henderson is pleased with the team's progress. "The team is on or ahead of schedule

for this time of year. It looks to be a very good season for us," he said.

Saturday the Mustangs will travel to Henderson's alma mater — Occidental College — for a double dual meet with Occidental and Division I San Diego State.

It will be the first scoring meet of the season and the first meet this year with a regular event schedule.

"Last year San Diego State beat us," Henderson said. "We would like to return the favor this year."

Women scorch track

The women's track team used their season opener at the Roadrunner Invitational Saturday in Bakersfield as a checkpoint in their training schedule.

"The primary purpose of our 1986 season debut was to serve as a dress rehearsal and to get a status check of our fall season training program," said coach Lance Harter.

Celeste Paquette put the shot a personal best of 42'6", which was good enough to put her in second place. She also threw the discus 136'11", which was a personal best and good enough to win the discus event. Carolyn Giovanola won the 400-meter low hurdles with a time of 67.0.

The Mustangs also have the strength of three activated red-shirts from last year. Lesley White, Kris Katterhagen and Katie Dunsmuir were all red-shirts in 1985, but are back and

in good shape as they ran controlled races in both the 5,000 meters and the two-mile relays.

Senior Kathy Kahn is back after two knee surgeries and is "exceeding her 1984 all-American discus form," according to coach Harter. She threw a 132'9", which was good enough to earn her fourth place.

A rusty Karen Kraemer, who took the 1985 season off to study in London is back and cleared 5'6" in the high jump.

Patricia Carpenter had two firsts in both the distance medley and mile relay. She is a four-time all-American and, according to Harter, she looks tougher this season.

"Our goals as a staff, regarding training were exceeded beyond expectation," Harter said. The Mustangs will meet Fresno State at Fresno Saturday.

Mark Tracey wrestles his way toward a dream

KAREN TEYS/Mustang Daily
Mark Tracey

By Tim Robinson
Staff Writer

Last year Mark Tracey wrestled in 190 pound weight division, he finished seventh best in the nation, and for many that would be a life long dream come true.

However, for Tracey, ranked number two in the nation this year, his dream doesn't stop until it reaches the National Championship, and he's not really interested in anything less.

"Ever since I was eight years old, I've read magazines on wrestling, where they keep the records of amateur wrestling, and I remember seeing the National Championships dreaming one day I'd be up there," said

Tracey, who is close to that threshold and has a legitimate shot at the dream.

On the mat Tracey is all business, and has been in the business since the not-so-tender age of eight. Meaning that Tracey, at 22, has been wrestling for nearly 14 years.

Tracey credits his older brother Tony, who was also highly ranked in the nation last year, for his start in wrestling. Tracey admits that his brother, who wrestled for Louisiana Tech last year, beat him the only time they ever wrestled in high school. Now, however, Tracey says he can beat his brother who wrestles in the smaller 167 pound class.

Tracey, a senior social science major, is originally from Albuquerque, N.M., where he wrestled for Fandia High School. From there, Tracey was recruited by the Arizona West Junior College wrestling coach Jim Teem.

Teem, who wrestled for Cal Poly and was a former all-American, was one of the reasons responsible for bringing Tracey to Cal Poly.

"I use to think about coming to Cal Poly even in high school, and he (Teem) definitely pushed me towards Cal Poly when I was there," said Tracey, who also added that former Cal Poly wrestling coach Vaughan Hitchcock was a personal friend of

Teem's, and was also instrumental in his decision.

It was, however, not just the school's strong wrestling program that attracted Mark, who has serious intentions of entering law school after he receives his degree.

"It was probably the reputation. I would read about Cal Poly in high school and how well their wrestling teams did. Also, I would hear about how good their academics were," said Tracey.

That led Tracey to Cal Poly and has now taken him to the doorstep of a possible NCAA Championship. However, the road to the title goes directly through Norman, Okla., where a certain Melvin Douglas resides.

Douglas, who is currently the defending champion and ranked number one in the country, defeated Tracey rather handily in their first meeting. Tracey, who wrestled Douglas in early January at the end of grueling roadtrip, is not about ready to concede the title to Douglas, however.

"I need to work harder and get in better shape, he was a little stronger than I was, but I think I could still beat him," said Tracey, who adds that Douglas is very large and exceptionally strong for a wrestler at 177 pounds.

Douglas has to cut a great deal of weight to make the division, which is similar to Tracey's situation and why he wrestles in the 177 pound class.

"I was kind of small for my weight class, and I ended up seventh in the nation," said Tracey, who believes his chances for a National Championship are much better in the smaller class and justifies his jump to that weight with one thing in mind. "I just want to win it," he said.

Tracey, his coach and teammates still believe that when the PCAA championship rolls around, they'll still be a team to contend with. However, for Tracey, a nationally-recognized standout and a very unselfish team player, there is still a slight agony when the Mustangs lose.

"I'm kind of depressed with the team not doing very well. It is kind of hard not to let it interfere with your performance. It is an individual sport, but your teammates, those are your best friends out there, and you want to succeed as well, so it definitely has an effect on you when you're not winning," said Tracey.

However, wrestling in college for Tracey is only part of his story — a story he hopes might end at George Washington University law school, located in Washington D.C.

There is also some thought of the 1988 Olympics in Seoul, Korea, but that is not likely.

"I have not put of a lot of thought into it (Olympics). I just want to concentrate on the nationals, and then take it from there. But I kind of think it will be my last year of competition."

TOP ENGINEERING AND TECHNICAL GRADUATES

WE HAVE A LOT IN COMMON

Innovation, challenge, openness, that's Intel. Just the kind of environment you need to make the most of your hard earned degree. Consider some of our most important firsts: Random Access Memory (RAM), Erasable Programmable Read Only Memory (EPROM), the first microprocessor, the first single board computer, the first microcomputer development system and the first million bit bubble memory. Ours is the kind of environment where you can become a moving force behind the shape of future technology. If you're looking for the kind of career that gives you almost immediate opportunities for success, look to Intel; you'll find we have a lot in common.

If you are unable to meet with us, please contact Intel College Relations at the location of your choice.

SEMESTER

At Sea

THE WORLD
IS YOUR CAMPUS

Study around the world, visiting Japan, Korea, Taiwan, Hong Kong, Sri Lanka, India, Egypt, Turkey, Greece and Spain. Our 100 day voyages sail in January and September offering 12-15 transferable hours of credit from more than 50 voyage-related courses.

The S.S. UNIVERSE is a 500 passenger American-built ocean liner, registered in Liberia. Semester at Sea admits students without regard to color, race or creed.

For details call toll-free (800) 854-0195
